Summary

Front-end developer with more than five years of experience in developing WebGIS applications, customizing submodules and libraries. Aiming to take on new challenges and utilize my coding and debugging skills for developing new features and enhance the overall user experience.

Experience

Front-End developer, Saafaa, Yazd, Iran

July 2021 - present

It's a knowledge-Based company developing WebGIS applications to share, gather and monitor spatial data

- Developed and maintained scalable Angular-based WebGIS applications, delivering efficient and high-performance geographic information system solutions.
- Built a Fleet Management System enabling real-time vehicle tracking and management, improving operational efficiency and supporting data-driven decision-making. Led performance optimization initiatives for long-running real-time data flows, including identifying and resolving memory leaks, improving rendering efficiency, and enhancing application responsiveness under high data load.
- Designed, implemented, and maintained the Geoportal project, a web mapping platform similar to Google Maps and Map.ir.
- Designed and implemented reusable Angular components, submodules, and shared libraries to ensure modularity, scalability, and long-term maintainability aligned with project requirements.

Skills

- **Front-End:** HTML, CSS, SCSS, Bootstrap, Tailwindcss, Javascript, Responsive Design, Typescript, Angular, RxJS, REST APIs, Angular Material, NgZorro(Ant Design for Angular), PrimeNG, ReactJS, Shadcn
- **GIS:** Openlayers, ol-ext, GeoServer, GeoNetwork

- **UI/UX:** Figma, Adobe XD
- **Other:** Git (Github & Gitlab), Docker, Jira

Education

Bachelor's degree, Computer Software Engineering, Yazd University, Yazd, Iran	2016-2021
Master's degree, Artificial Intelligence, Isfahan University of Technology, Isfahan, Iran	2022-2024
