

MOHAMMAD REZA MOUSAVI

SENIOR FRONT-END DEVELOPER

+98 913 855 2826 | rezamousavi354@gmail.com | [linkedin.com/in/mohammadreza-mousavi](https://www.linkedin.com/in/mohammadreza-mousavi) | Yazd, Iran

PROFESSIONAL SUMMARY

Front-End Developer with 5+ years of experience building enterprise WebGIS applications and spatial information systems. Specializes in scalable Angular architecture, reusable UI systems, high-performance interactive maps, and clear user experiences for complex geospatial workflows. Proven in leading front-end delivery and optimizing long-running, data-intensive applications.

TECHNICAL SKILLS

Front End: Angular, TypeScript, JavaScript, React, RxJS, HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS

UI & Architecture: PrimeNG, Ng-Zorro, Angular Material, Shadcn UI, responsive design, reusable components, design systems, REST APIs

WebGIS: OpenLayers, ol-ext, Cesium, GeoServer, GeoNetwork, OGC standards, spatial data, web mapping

Tools: Git, GitHub, GitLab, Docker, Jira, Figma, Adobe XD

PROFESSIONAL EXPERIENCE

Front-End Developer | Saafaa - Yazd, Iran July 2021 - Present

Knowledge-based software company developing WebGIS applications to collect, share, visualize, and monitor spatial data.

- Develop and maintain scalable Angular-based WebGIS applications, delivering responsive, high-performance geographic information systems.
- Led front-end delivery of a real-time fleet management platform, supporting live vehicle tracking, route visualization, operational monitoring, and high-frequency location updates.
- Diagnosed and resolved memory leaks and rendering bottlenecks in long-running real-time workflows, improving responsiveness under heavy data loads.
- Designed and maintained Geoportal, a public web-mapping platform with map layers, spatial analysis, geographic services, and administration tools.
- Built reusable Angular components, shared libraries, and submodules to improve consistency, scalability, and long-term maintainability.

SELECTED PROJECTS

Geotajak - Developer

Angular | OpenLayers | GeoServer | REST API | OGC

Developed an enterprise spatial information platform for managing, integrating, visualizing, and sharing geographic information across organizations.

Fleet Management System - Front-End Lead & Developer

Angular | OpenLayers | RxJS

Led development of a Traccar-based real-time monitoring platform for live tracking, operational oversight, route visualization, and large-scale location updates.

Geoportal - Front-End Lead & Developer

Angular | OpenLayers | GeoServer | OGC

Built a citizen-oriented spatial portal for maps, layers, spatial analysis, and public geographic services, including publishing and configuration tools.

Geonet - Front-End Lead & Developer

Angular | GeoServer | OGC

Developed a centralized catalog for discovering, organizing, managing, and sharing geographic datasets through standards-based geospatial services.

Embedded Map - Developer

Angular | OpenLayers | TypeScript

Built a lightweight, configurable map component that brings advanced GIS layers, basemaps, controls, and visualizations into external systems.

EDUCATION

Master's Degree, Artificial Intelligence | Isfahan University of Technology, Isfahan, Iran 2022 - 2024

Bachelor's Degree, Computer Software Engineering | Yazd University, Yazd, Iran 2016 - 2021
